Subject Index

A

Accelerometer
  validation of Stanford 7-Day Recall, 145–153
ACE inhibitors
  prostate cancer, 531–539
Adverse outcomes
  hepatitis B vaccine in children, 13–21
  pregnancies of asthmatic women, 7–12
African America Diabetes Mellitus (AADM) study
  mapping type 2 diabetes susceptibility genes, 51–58
African Americans
  sampling frames, 385–388
Age
  breast density by race, 257–263
  smoking and detection bias, 238–247
Aged
  change in somatic and mood symptoms, 361–368
  Medicare data on elderly hospitalized for septicemia, 118–126
Agent Orange
  hepatic abnormalities in Vietnam veterans, 304–311
Age-related macular degeneration
  zinc intake, 328–336
Aging
  familial associations of cardiovascular risk factors 519–525
Agriculture
  reproducibility of farming history among women, 178–185
AIDS (Acquired Immunodeficiency Syndrome)
  surveillance data evaluation, 443–449
Alcohol consumption
  folate intake and colon cancer, 65–72
  Italy, 312–319
  liver cirrhosis, 458–465
  maternal alcohol drinking and risk for IUGR, 497–503
  Russian mortality, 1–6
Allergies
  seasonal allergic rhinoconjunctivitis and fatty acid intake, 59–64
Amsterdam Growth and Health Study
  longitudinal relationship of coronary heart disease and lifestyle, 157–165
Antihypertensives
  prostate cancer, 534–542
Apolipoprotein E (Apo E)
  cardiorespiratory fitness and plasma lipids, 94–103
Asthma
  complicating pregnancy, 7–12
  computer ranking by probability, 369–376
Atherosclerosis
  autopsy, 264–270
Atherosclerosis Risk in Communities (ARIC) study
  fibrinogen polymorphism and coronary heart disease, 166–170
Autopsy
  cardiovascular disease, 264–270

B

Bacteremia
  Medicare data on hospitalized elderly, 118–126
Bayes Theorem
  asthma, 369–376
Beta blockers
  prostate cancer, 534–542
Bias
  confounder selection in epidemiologic studies, 38–45
Birth certificates
  validation of data, 186–193
Birth defects
  pregnancy outcomes of Gulf War veterans, 504–511
Birthweight
  maternal alcohol drinking and risk for IUGR, 497–503
  postneonatal mortality, 208–212
  surfactant and neonatal mortality rate, 337–341
Bladder
  cigarette smoking and risk of cancer, 28–37
Blood donors
  KSHV, 512–518
Blood pressure
  errors in self-reported dietary intake, 85–93
  primary prevention, 271–279
  risk of cataract, 104–110
Breast cancer
  electromagnetic fields, 297–303
Breast implants
  cancer risk, 248–256

C

Caffeine
  liver cirrhosis, 458–465
CagA
  gastric cancer risk, 543–546
Calcium channel blockers
  prostate cancer, 531–539

pancreatic cancer among postmenopausal women, 560–564
physical activity and non-insulin-dependent diabetes mellitus, 320–327
rural living and sarcoidosis, 111–117
Cataract
male blood pressure, 104–110
Cause of death
evaluation of NDI Plus data, 46–50
Census data
area and individual-level indicators, 395–405
determining race and education as SES indicators, 171–177
Children
gastric cancer risk, 543–546
hepatitis B vaccine, 13–21
China
DDT and spontaneous abortion, 491–496
gastric cancer risk, 543–546
Cigarette smoking
risk of bladder, pancreas, kidney, and colorectal cancers, 28–37
Civic engagement
firearm prevalence and social capital, 484–490
Cocaine-related disorders
social environmental factors, 389–394
Coffee
liver cirrhosis, 458–465
Cohort effect
blood pressure, 271–279
Cohort studies
obtaining optimal mortality follow-up, 292–296
respiratory complications of gastroesophageal reflux, 477–483
Coitus
female condom effectiveness trial, 428–433
female-to-male HIV transmission (letter), 154–155
Colon cancer
cigarette smoking, 28–37
folate intake, 65–72
Common cold
active and passive smoking, 225–231
Confounding factors
identification and selection in epidemiologic studies, 38–45
Contraception behavior
female condom effectiveness trial, 428–433
Coronary disease
clustering of risk factors, 157–165
β-fibrinogen gene 2455G/A polymorphism, 166–170
Correlation
nutrient intake, 406–416
Cross-sectional studies
seasonal allergic rhinoconjunctivitis and fatty acid intake, 59–64
smoking and fibrinogen levels, 232–238

D

Data collection
reproducibility of farming history among women, 178–185
Databases, administrative
death identification and confirmation rate, 292–296
Department of Veteran's Affairs, 286–291
driver's license and voter registration lists as sampling frames, 385–388
occupational and environmental studies (editorial), 281–285

AEP Vol. 11, No. 8
November 2001: 584–591

DDE
spontaneous abortion, 491–496
DDT
spontaneous abortion, 491–496
Death certificate
evaluation of NDI Plus data, 46–50
obtaining optimal mortality follow-up, 292–296
veterans, 286–291
Decision making
model selection and analysis, 377–384
Depressive symptoms
elderly, 361–368
Detection bias
smoking and age at lung cancer diagnosis, 238–247
Diabetes mellitus
physical activity, 320–327
Diet
folate intake and colon cancer, 65–72
liver cirrhosis, 458–465
seasonal allergic rhinoconjunctivitis and fatty acid intake, 59–64
social desirability trait and self-reports, 417–427
Dietary assessment
nutrient prediction methods, 213–218
Dioxin
hepatic abnormalities in Vietnam veterans, 304–311
Disaster-related injuries
urban night-time earthquake, 347–357
Diuretics
prostate cancer, 531–539
Drug use
social environment, 389–394

E

Ecologic fallacy
census data to derive SES indicators, 171–177
Education
census data to derive SES indicators, 171–177
SES and health, 75–84
social desirability trait and self-reported diet, 417–427
Elderly
somatic and mood symptoms, 361–368
Electrolytes
errors in self-reported dietary intake, 85–93
Electromagnetic fields
breast cancer, 297–303
Endometrial neoplasms
synchronous primary cancers, 529–533
Environmental exposure
sarcoidosis, 111–117
Environmental hazards
risk factors for earthquake injuries, 347–357
Epidemiologic research methods
comparability of procedures for determining cause of death, 46–50
confounder selection in data analysis, 38–45
Medicare data, 118–126
reproducibility of farming history among women, 178–185
Estrogen
epithelial ovarian cancer, 568–574
Ethnicity
area and individual-level indicators, 395–405
breast density, 257–263
census data to derive SES indicators, 171–177
physical activity and non-insulin-dependent diabetes mellitus, 320–327
Evaluation studies
AIDS surveillance data, 443–449
Exercise
Apo E and plasma lipids, 94–103
non-insulin-dependent diabetes mellitus, 320–327
validation of Stanford 7-Day Recall, 145–153

F

Familial aggregation
nonsyndromic oral clefts, 434–442
Familial associations
cardiovascular risk factors influenced by age, 522–528
Familial genetics studies
subject recruitment for research, 219–224
Family planning
female condom effectiveness trial, 428–433
Fatty acids
seasonal allergic rhinoconjunctivitis, 59–64
Female condoms
effectiveness trial, 428–433
Fibrinogen
smoking, 232–238
β-fibrinogen gene 2455G/A polymorphism
incidence of coronary heart disease, 166–170
Firearms
social capital, 484–490
Folate
colon cancer risk, 65–72
nutrient intake, 406–416
Follow-up studies
alcohol drinking pattern and mortality in Italy, 312–319
mortality, 292–296
relationship of coronary heart disease and lifestyle, 157–165
somatic and mood symptoms in elderly, 361–368
Food frequency questionnaire
assessment of nutrient intake, 406–416
nutrient prediction methods, 213–218
social desirability trait and self-reports, 417–427

zinc and age-related macular degeneration, 328–336
Fracture
renal transplantation, 450–457
Fuzzy sets
model selection and analysis, 377–384

G

Garlic
gastric cancer risk, 540–543
Gastric cancer
indicators in children in China, 543–546
Gastroesophageal reflux
respiratory complications, 477–483
Gender
economic sector and cardiovascular disease, 194–201
General pathology
SES and health, 75–84
Genes
type 2 diabetes susceptibility, 51–58
Gibbs sampling
errors in self-reported dietary intake, 85–93
Gulf War
pregnancy outcomes of veterans, 504–511
Guns
social capital, 484–490

H

Hay fever
fatty acid intake cross-sectional study in Japan, 59–64
Health status
comparison of educational attainment with occupation-based indicators, 75–84
Heart rate
prostate cancer, 534–542
Height
risk of fatal prostate cancer, 22–27
Helicobacter pylori
gastric cancer risk, 543–546
Hepatic abnormality
Vietnam veterans, 304–311
Hepatitis B vaccine
adverse outcomes in children, 13–21
Hepatitis B virus
liver cirrhosis, 458–465
Hepatitis C virus
liver cirrhosis, 458–465
Heroin dependence
social environmental factors, 389–394
Hiatal hernia
respiratory complications, 477–483
Hispanic American
physical activity and non-insulin-dependent diabetes mellitus, 320–327
HIV
prevalence among inmates, 342–346
female-to-male transmission (letter), 154–155
Hormonal factors
pancreatic cancer among postmenopausal women, 563–567
Hospitalization
Medicare data used in epidemiology, 118–126
24-hr recall
assessment of nutrient intake, 406–416
Hypertension
primary prevention, 271–279
risk of cataract, 104–110
Hysterectomy
prevalence corrected rates and probabilities, 127–135

I

Incidence
cancer, 248–256
prevalence corrected hysterectomy rates and probabilities, 127–135
public health burden of cancer in the U.S., 547–553
Infant
hepatitis B vaccine, 13–21
postneonatal mortality, 208–212
surfactant and neonatal mortality rate, 337–341
Informed consent
familial cancer research, 219–224
Injury severity score
urban night-time earthquake, 347–357
Inmates
HIV prevalence, 342–346
Interviews
stroke symptom onset time, 202–207
Intrauterine growth retardation (IUGR)
maternal alcohol consumption, 497–503
Italy
alcohol drinking pattern and mortality, 312–319

J

Japan
nutrient prediction methods, 213–218
seasonal allergic rhinoconjunctivitis and fatty acid intake, 59–64

K

Kaposi's sarcoma-associated herpesvirus (KSHV)
blood donors, 512–518

AEP Vol. 11, No. 8
November 2001: 584–591

Kidney
cigarette smoking and risk of cancer, 28–37

L

Life table
hysterectomy prevalence rates and probabilities, 127–135
public health burden of cancer in the U.S., 547–553
Lifestyle
clustering of coronary heart disease risk factors, 157–165
Linkage
mapping type 2 diabetes susceptibility genes in AADM study, 51–58
Lipoproteins
Apo E, fitness, and plasma lipids, 94–103
Liver cirrhosis
caffeine, 458–465
Longitudinal study
alcohol drinking pattern and mortality in Italy, 312–319
Lung neoplasms
smoking and detection bias, 238–247

M

Malignant neoplasms
measuring public health burden in the U.S., 544–550
Mammography
variation in breast density by race, 257–263
Mass screening
ranking likelihood of asthma, 369–376
Maternal alcohol use
nonsyndromic oral clefts, 434–442
Maternal smoking
nonsyndromic oral clefts, 434–442
Measurement error
self-reported dietary intake, 85–93
Medical databases
pitfalls (letter), 358–359, 360
Medical records
stroke symptom onset time, 202–207
Medicare
data on elderly hospitalized for septicemia, 118–126
research data (letter), 358–359, 360
Menstrual cycle
female condom effectiveness trial, 428–433
Metal workers
testicular cancer, 551–559
Model selection
path analysis and multi-criteria decision making, 377–384
Mood
elderly, 361–368
Morbidity
refinery workers, 466–476
Mortality
alcohol drinking pattern in Italy, 312–319
Department of Veteran's Affairs databases, 286–291
economic sector and cardiovascular disease, 194–201
height and risk of fatal prostate cancer, 22–27
postneonatal, 208–212
prevalence corrected hysterectomy rates and probabilities, 127–135
public health burden of cancer in the U.S., 547–553
refinery workers, 466–476
surfactant and neonatal mortality rate, 337–341
MSX1
nonsyndromic oral clefts, 434–442
Multiple primary neoplasms
endometrial and ovarian cancer, 526–530
Mutual trust
firearm prevalence and social capital, 484–490

N

National Death Index (NDI) Plus
comparability of procedures for determining cause of death, 46–50
National Health Interview Survey (NHIS)
height and risk of fatal prostate cancer, 22–27
hepatitis B vaccine in children, 13–21
National Longitudinal Mortality Survey (NLMS)
economic sector and cardiovascular disease, 194–201
Natural disasters
risk factors for earthquake injuries, 347–357
Neighborhood
area and individual-level indicators, 395–405
drug use, 389–394
Neoplasms
cigarette smoking and risk of, 28–37
Neural network (computer)
ranking likelihood of asthma, 369–376
Nutrition
errors in self-reported dietary intake, 85–93
nutrient prediction methods, 213–218
social desirability trait and self-reported diet, 417–427
supplemental Vitamin E, 136–144

O

Occupational exposures
breast cancer, 297–303
cardiovascular disease, 194–201
refinery workers, 466–476
testicular cancer in Sweden, 554–562
Occupational groups
SES and health, 75–84
Oral clefts

genetic and environmental risk factors, 434–442
Oral contraceptives
epithelial ovarian cancer, 568–574
Organochlorines
spontaneous abortion, 491–496
Osteoporosis
renal transplantation, 450–457
Ovarian neoplasms
reproductive risk factors, 568–574
synchronous primary cancers, 526–530

P

Pancreas
cigarette smoking and risk of cancer, 28–37
Pancreatic cancer
hormonal factors among postmenopausal women, 563–567
Parent-offspring correlation
cardiovascular risk factors influenced by age, 522–528
Parity
epithelial ovarian cancer, 568–574
Path analysis
model selection and analysis, 377–384
PCBs
spontaneous abortion, 491–496
Peptic esophagitis
respiratory complications, 477–483
Pesticides
reproducibility of farming history among women, 178–185
spontaneous abortion, 491–496
Physical activity
non-insulin-dependent diabetes mellitus, 320–327
validation of Stanford 7-Day Recall, 145–153
Population
public health burden of cancer in the U.S., 547–553
Population surveillance
AIDS, 443–449
Pregnancy
asthma, 7–12
DDT and spontaneous abortion, 491–496
Gulf War veterans, 504–511
maternal alcohol drinking and risk for IUGR, 497–503
surfactant and neonatal mortality rate, 337–341
validation of birth data, 186–193
Prevalence
autopsy, 264–270
Primary prevention
blood pressure, 271–279
Prison
HIV prevalence, 342–346
Probability
asthma, 369–376
prevalence corrected hysterectomy rates, 127–135
Prospective studies
zinc and age-related macular degeneration, 328–336
Prostate cancer
height and risk of fatality, 22–27
hypertension and heart rate, 534–542
Psychology
social desirability trait and self-reported diet, 417–427
Public health
burden of cancer in the U.S., 547–553
pregnancies of asthmatics, 7–12
Pulmonary surfactants
neonatal mortality rate, 337–341

R

Recall
reproducibility of farming history among women, 178–185
Rectum
cigarette smoking and risk of cancer, 28–37
Refinery workers
mortality and morbidity surveillance, 466–476
Renal transplant
hospitalization for fractures, 450–457
Reproducibility of results
AIDS surveillance data, 443–449
farming history among women, 178–185
Respiratory tract diseases
gastroesophageal reflux, 477–483
Risk
aging and depressive symptoms, 361–368
augmentation mammoplasty and cancer, 248–256
cigarette smoking and selected cancers, 28–37
DDT and spontaneous abortion, 491–496
folate intake and colon cancer, 65–72
from hepatitis B vaccine, 13–21
height and fatal prostate cancer, 22–27
hypertension and cataract, 104–110
lifestyle and coronary heart disease, 157–165
maternal alcohol drinking and IUGR, 497–503
physical activity and non-insulin-dependent diabetes mellitus, 320–327
refinery workers, 466–476
renal transplantation and fractures, 450–457
rural living and sarcoidosis, 111–117
smoking and common cold, 225–231
smoking and fibrinogen levels, 232–238
urban night-time earthquake injuries, 347–357
Risk assessment
hepatitis B vaccine in children, 13–21
Risk factors

AEP Vol. 11, No. 8
November 2001: 584–591

epithelial ovarian cancer, 568–574
gastric cancer, 543–546
pancreatic cancer, 563–567
prostate cancer, 534–542
synchronous primary endometrial and ovarian cancers, 529–533
Rural
reproducibility of farming history among women, 178–185
sampling African Americans, 385–388
Russia
alcohol and cardiovascular disease, 1–6

S

Sampling frames
driver's license and voter registration lists, 385–388
Sarcoidosis
rural exposures, 111–117
Selection criteria
confounder selection in data analysis, 38–45
Self-report measures
social desirability trait, 417–427
Semen
role in female-to-male HIV transmission (letter), 154–155
Septicemia
Medicare data on hospitalized elderly, 118–126
Seroprevalence
KSHV in blood donors, 512–518
Sib-pairs
mapping type 2 diabetes susceptibility genes in AADM study, 51–58
Smoking
detection bias at lung cancer diagnosis, 238–247
fibrinogen levels, 232–238
liver cirrhosis, 458–465
risk of colds, 225–231
Social capital
firearms prevalence, 484–490
Social class
area and individual-level indicators, 395–405
Social desirability trait
self-reported diet, 417–427
Social environment
drug use, 389–394
Social inequalities
cardiovascular disease, 194–201
Social network
firearms prevalence, 484–490
Socioeconomic status (SES)
area and individual-level indicators, 395–405
cardiovascular disease, 194–201
derived from census data, 171–177
educational attainment compared with occupation-based indicators, 75–84
Spontaneous abortion
pesticides, 491–496
pregnancy outcomes of Gulf War veterans, 504–511
Stanford 7-Day Recall (7-DR)
validation of physical activity assessment, 145–153
Stroke
symptom onset time, 202–207
Subject recruitment
familial cancer research, 219–224
Surfactant
neonatal mortality rate, 337–341
Sweden
occupation-specific risk of testicular cancer, 554–562
Symptoms
SES and health, 75–84
Synchronous neoplasms
endometrial and ovarian cancer, 529–533

T

Tea
liver cirrhosis, 458–465
Teenage mothers
pregnancies of asthmatics, 7–12
Testicular cancer
occupational exposures in Sweden, 554–562
Time trends
autopsy, 264–270
α-Tocopherol
nutrient intake, 406–416
supplemental Vitamin E, 136–144
γ-Tocopherol
supplemental Vitamin E, 136–144
Transforming growth factor α
nonsyndromic oral clefts, 434–442
Type 2 diabetes
mapping susceptibility genes, 51–58

V

Validation
assessment of nutrient intake, 406–416
birth certificate data, 186–193
census data to derive SES indicators, 171–177
Department of Veteran's Affairs databases, 286–291
7-DR physical activity assessment, 145–153
Vasodilators
prostate cancer, 531–539
Veterans
hepatic abnormalities in Vietnam veterans, 304–311
pregnancy outcomes of Gulf War veterans, 504–511
vital statistics, 286–291
Vietnam War

hepatic abnormalities in veterans, 304–311
Vital statistics
obtaining optimal mortality follow-up, 292–296
veterans, 286–291
Vitamin C
nutrient intake, 406–416
Vitamin E
serum tocopherol levels in women, 136–144

W

West Africa
mapping type 2 diabetes susceptibility genes in AADM study, 51–58
Women's health
augmentation mammoplasty and cancer, 248–256
breast cancer, 297–303
pancreatic cancer, 563–567
prevalence corrected hysterectomy rates and probabilities, 127–135
reproducibility of farming history among women, 178–185
smoking and risk of colds, 225–231
variation in breast density by race, 257–263
Women's Health Initiative (WHI)
correlates of serum tocopherol, 136–144
Wounds and injury
urban night-time earthquake, 347–357

Z

Zinc intake
age-related macular degeneration, 328–336
